(54) CASE

(57)Abstract:

PROBLEM TO BE SOLVED: To protect a stored commodity from being stolen by providing a cover for opening and closing an opening through a proper hinge on the lower edge side of a case with the opening for taking in and out the commodity formed on its side face and also providing parallel engaging channels on the upper edges of the cover and the case.

SOLUTION: A case is constituted of a case body 2 with an opening for taking in and out a commodity on its side face and a cover 4 for opening and closing an opening through a hinge provided on the lower edge side of the case body 2. Parallel engaging channels 9, 9 are formed on the upper edge side of the case body 2 and the cover 4. Also a slider B is so constituted as to be engaged with the parallel engaging channels 9, 9 in the closed state of the case and to be inserted or removed freely therein and therefrom. In the above constitution, the case is prevented from being released by the slider B in the state of being engaged with the parallel channels 9, 9 to protect the commodity stored in the case displayed on a shelf from being stolen.
